

Partial Products Fruit

Punch Game

FREEBIE

Common Core Aligned 5.NBT.5

Created by: Tanya Villacis

Teachers,

This freebie aligns with common core standard 5.NBT.5. Your students will have fun while they practice using partial products to solve multi-digit multiplication problems. All you need is one die and two students! I usually provide whiteboards and expo markers for my students to do their work, but paper and pencil work too! Student directions are included. Simply print and laminate! ENJOY!

Partial Products Fruit Punch Game

Directions for Partial Products Fruit Punch Game:

- Take turns rolling die.
- If you land on a square that has a multiplication problem, you must solve it using partial products.
- Both students need to solve the problem so the person rolling can have their answer checked.
- If you get the answer right you stay on the new square. If you get the problem wrong, you must go back to your previous spot.
- If you land on a fruit square you skip ahead 3 spaces.
- First person to reach the finish square wins!
